

ALBERTO BUSNELLI

PROFESSIONAL SUMMARY

Senior Engineering Manager with 15+ years of experience leading global engineering and data platform initiatives across complex, international environments. Proven track record in designing and operating scalable data platforms, data pipelines and monitoring ecosystems supporting business intelligence, analytics and AI-driven use cases. Experienced in cross-functional leadership, stakeholder alignment, data governance, platform reliability and service management.

Passionate about transforming data into trusted business assets through strong governance, operational excellence and continuous improvement.

TECHNICAL SKILLS

- Hands-on experience with Cloud platforms (AWS, GCP) and scalable distributed systems architecture
- Expertise in designing and operating data pipelines (ETL/ELT) and distributed data processing systems
- Proven experience in defining data models, KPI frameworks, and enabling advanced analytics and data-driven decision-making
- Familiarity with DevOps practices, including CI/CD pipelines, automation and system integration
- Experience with containerization and orchestration technologies (Docker, Kubernetes) and modern software delivery practices

Strong knowledge of system reliability, performance optimization, incident management and root cause analysis

SOFT SKILLS

- Decisive, self-driven leader, effective under pressure
 - Clear, persuasive communicator with strong presentation skills
 - Fast learner with a sharp, analytical and strategic mindset
 - Experienced in team leadership and cross-functional collaboration
- Fluent in English, comfortable in international environments
Strong problem-solving attitude, focused on continuous improvement

EDUCATION

Bachelor's Degree in Computer Engineering
at Politecnico di Milano

High school Diploma at Liceo Scientifico "E. Majorana" – Desio

WORK EXPERIENCE

Senior Engineering Manager – Monitoring, Data Platforms & Operational Intelligence

Sky Italia | 2022 – Present

Leading a multinational engineering organization across Italy, the UK and India responsible for observability platforms, operational intelligence and data-driven monitoring solutions, driving strategic initiatives in AI-powered analytics, platform reliability and business-focused decision support.

OTT Streaming DevOps Manager

Sky Italia | 2019 – 2022

Transitioned from individual contributor to manager, leading the Streaming Engineering team responsible for Level-2 support of OTT platforms. Oversaw deep QoE KPI analysis to guide reliability improvements and drive data informed service optimizations.

OTT Streaming Engineer

Sky Italia | 2016 – 2019

Worked in a Streaming Engineering team handling platform engineering, Level-2 support, proactive maintenance, and QoE-KPI analysis across live/VOD workflows and large-scale streaming platforms for both Italy and Germany.

Software Developer

Piksel / Polymedia | 2008 – 2016

Developed Java-based web applications, intranets and e-commerce systems for media and sports clients. Built solid foundations in backend engineering, performance optimization and solution delivery.
